THE BIG EFFECT COLLECTION: MASSIMO

Make it big: that's what our Massimo collection is all about. With its unprecedentedly long and wide planks, and superior authenticity and craftsmanship, this truly unique wooden floor breathes luxury.

Massimo's story starts with wood, nature's most noble raw material. Massimo is marked by carefully handpicked planks with large knots and cracks, creating a vibrant appearance. Because filling is done manually, knots retain their natural look and the authentic character of the floor is respected. As a result, your floor will always have a lively variation in colour and structure and a rustic appearance. To enhance the nude, untreated look, and protect the floor against stains from coffee and wine, Massimo planks are finished with extra matt lacquer.

What about practical considerations? We're talking engineered wood here, crafted through a combination of artisan principles and the latest design and production technologies. This means that you get maximum stability, along with quick-and-easy installation thanks to Quick-Step's patented Uniclic® system.

Massimo comes in four beautiful decors, developed in-house by our design team and in line with the latest trends in architecture, fashion and design. Whatever style fits your personality, Massimo can make your biggest dreams come true.

VIBRANT

Large knots and cracks, for a floor with character.

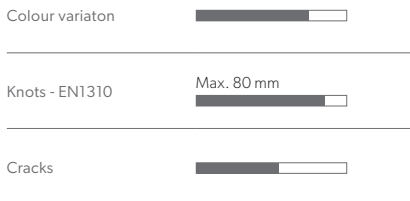

(DEEP) BRUSHED

Brushing accentuates the natural grain structure of the wood plank and adds depth.

NATURAL KNOTS

Knots are a natural part of wood and emphasize its liveliness. By incorporating knots with a subtle sunken surface, we accentuate the authentic look of our floors, creating more depth as well as an aged look.

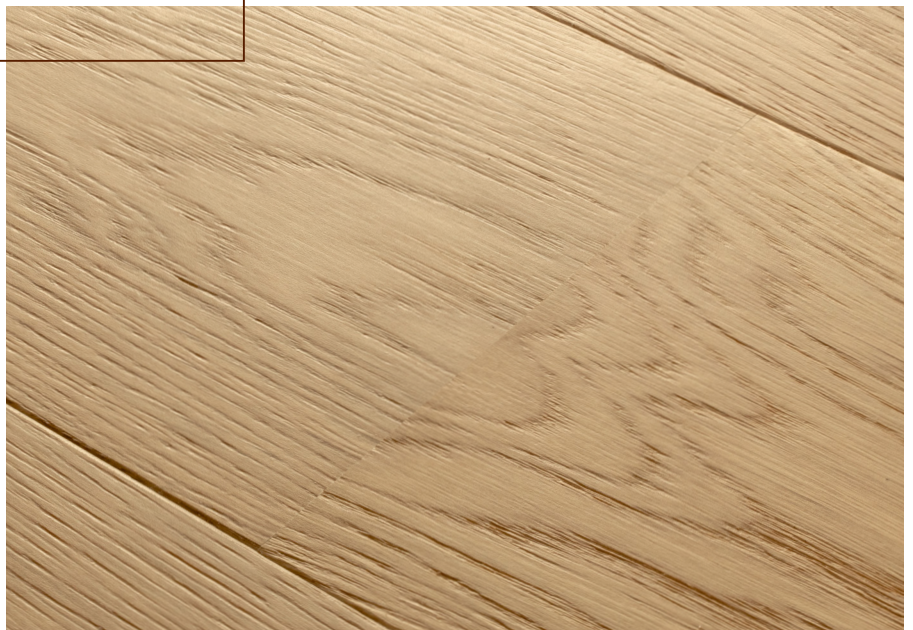

MAXIMUM PLEASURE, EASY MAINTENANCE

Massimo is finished with an advanced lacquer to give your floor added resistance to wear, marks and scratches. The water-repellent Surface & Edge Protect+ technology also helps to prevent water, dirt and grime from being trapped in the open grain or penetrating between the joints of your floor. This helps to keep the planks looking as good as new. Thanks to the unique combination of this technology and our authentic floor designs, you will be able to enjoy your floor's beauty for years to come.
